

PRENSA CABOS, ALIVIADOR DE ESFORÇO

OKW
GEHÄUSE
SYSTEME

MECÂNICO

- Prensa-cabos com alta classe de proteção IP 68, nos tamanhos de M12 a M32, com um anel de vedação de roscas externas.
- Novas no programa são as prensas-cabos com elemento de compensação de pressão integrado M12 até M20.
- O prensa-cabos quick fix apenas se estende na caixa por alguns milímetros, não prejudicando desta forma quaisquer outros componentes no interior. Eles também são fáceis de instalar sem ferramentas especiais.
- Aliviador de esforço mecânico para proteger os cabos elétricos de stress mecânico.
